$\qquad$
There are two rules for determining the number of significant figures:

1) If there is no decimal point--start at the RIGHT and count, beginning with the first non-zero digit.

| Examples | 340 | 2 s.f. |
| :--- | :--- | :--- |
|  | 30400 | 3 s.f. |
|  | 34955 | 5 s.f. |

2) If there is a decimal point--start at the LEFT and count, beginning with the first non-zero digit.

| Examples | 340. | 3 s.f. |
| :--- | :--- | :--- |
|  | 30400. | 5 s.f. |
|  | 0.34955 | 5 s.f. |
|  | 0.00040 | 2 s.f. |

Determine the number of significant figures (s.f.) in each of the following:
a) 921
b) 92100
c) 92100 .
d) 0.000210
e) 0.00219
f) $93,000,000$
g) $93,000,003$
h) $93,000,000$.

There are also rules for reporting numbers when you multiply and/or divide:

1) Count the sig. figs. in the numbers you are multiplying and/or dividing. Your answer should be rounded off to the smallest number of sig. figs. in your problem.

Example:

$\begin{array}{cc}\text { " } 88.3896 " \\ \uparrow & \leftarrow---- \text { calculator answer } \\ 6 \text { s.f. } & \text { so round to } 3 \text { s.f. }\end{array}$
Your answer will be reported as 88.4
b) $28.44 \div 3.12=$ " 9.080128205 " $\leftarrow----$-calculator answer

4 s.f. $\quad 3$ s.f. 6 s.f. so round to 3 s.f.
Your answer will be reported as 9.08
Reminder: Rounding-off rules: Go to next number. If it is $0-4$, round down. If it is $5-9$, round up.

Report the answer to the following problems, paying particular attention to the correct number of sig. figs.
a) $986.72 / 5.12=$
b) $497.7 / 3.0=$
c) $920.7 / 4.32=$
d) $400.20 \times 3.010=$
e) $98 \times 0.006=$
f) $.009430 \times 4310.9=$
g) $45.20 \times 0.0071=$
h) $9.0 / 3.0=$
i) $10 . \times 300=$
j) $10 . / 3=$

There are also different rules for reporting the answer when you add or subtract:

1) The answer should have the same number of decimal places as that of the number with the least decimal.

$$
\begin{aligned}
& \text { Example: } 4.838 \mathrm{~g} \quad 486.58 \mathrm{~g} \\
& \frac{+1.0023 \mathrm{~g}}{5.3853 \mathrm{~g}}=5.385 \mathrm{~g} \quad \frac{-421 . \mathrm{g}_{\mathrm{C}}}{65.58 \mathrm{~g}}=66 \mathrm{~g} \\
& \text { is } 0-4 \text {, so round down. is } 5-9 \text {, so round up. }
\end{aligned}
$$

NOTE: IN ADDITION AND SUBTRACTION, DECIMAL POINTS MUST BE LINED UP!!
Solve the following:
a) 0.00000313
b) 4.9670
c) 0.000343
d) 78
$\qquad$ -3.1
$+0.17$

- .99
e) $336,000-33,000.03=$
f) $0.99-.1=$
